DATA	Teguflex
-------------	-----------------

Note: Yellow fields must be filled in order to give us enough data to make an offer.

Expansion Joint Data

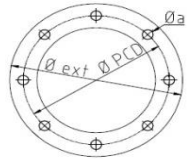

Nominal Diameter "DN"		mm
Building Length "L"		mm
Fluid passing through the joint or Rubber material		-
Quantity		Set.
Working pressure:		bar
Vacuum pressure (Min= 0 bar, Max= 1 bar):		bar
Working Temperature:		°C

Flange drilling

Please, mark with "x" in the appropriate field.

Standard drilling: PN6	
Standard drilling: PN10	
Standard drilling: PN16	
Standard drilling: Ansi150lbs	
Other standard drilling (Write name)	
Others:	

Note: For not-standard drillings please fulfill these fields:

Outer Diameter (ϕ_{ext})		mm	
Pitch Center Diameter (PCD)		mm	
Holes diameter (ϕ_a)		mm	
Numbers of holes (Na)		pce	
Flange thickness (e)		mm	

COMPLEMENTARY DATA

Note: If these fields are left blank, we will use our standard values.

Characteristic	Client Data	Teguflex standard values
Flanges material:		Carbon steel - 235
Flange finishing treatment:		Zinc Coated.
Tie System (Yes/No)		No
Tie System material:		Carbon steel - 235
For tied systems: Washers in 1 side or 2 sides		1 side (Only for tied systems)
